Art Unit: 3621

1. Claims 6-8, 13 and 14 are allowed.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

The closest prior art of record is US Publication NO. 2004/0044482 to Takeda et al.

Takeda et al. disclose a collating unit comprising a fingerprint parameter memory section for storing fingerprint and arithmetic section for executing comparative collation between a fingerprint that is inputted via a reading portion and the stored fingerprint. Thus, in the case where it is discriminated that both parameters are in correspondence with each other, the arithmetic section sends out certification information to a controller as collation result. Takeda et al. taken either individual or in combination with other prior art of record fails to teach or suggest an issuer pseudo-random generator, responsive to said customer database, for generating a pseudo-random customer code, wherein said customer code is generated in accordance with said user specific algorithm, and an issuer comparator, coupled to said customer database and said issuer generator, for comparing said customer code to said PIN, wherein the user is authorized and the device activation verified to access information when said customer code is equivalent to said PIN as recited in independent claims 5 and 14.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
